GenChoice™ semen produced since September 2020 as Sexed Ultraplus™.

Empowering tomorrow's cows to perform.

ICC™ is a true legacy index that has helped producers like you build their next generation over the past decade. New this April is an update to the formula, reflecting our commitment to ensuring you and your future herd is covered.

With the April 2024 update, the ICC™ formula was simplified and refocused to emphasize sustainability and create even more efficient, productive and problem-free cows. Additional emphasis was placed on Fat, Protein and Productive Life.

How does ICC™ compare to other indexes?

ICC™	TPI®	NM\$
Well-rounded index focused on traits that produce a sustainable cow. + Production Efficiency + Health and Sustainability + Fertility	Selection on TPI® will create a larger, less feed-efficient cow with less focus on cow health, longevity and reproduction.	Selection on NM\$ puts greater emphasis on Fat but less on cow longevity, health and reproduction.
