GenChoice™ semen produced since September 2020 as Sexed Ultraplus™.

Genetics That Do More. For Longer.

Every cow in your herd is an investment. And the longer she stays healthy, breeds back and puts milk in the tank, the greater your return. That's why we've enhanced the ICC™ index for 2025 – to help you **build a more efficient, fertile, long-lasting and productive herd.**

“

The philosophy behind our GENEX sire program is to produce cattle that are profitable and healthy, and that's what the ICC™ index is all about. I've had the opportunity to see tremendous improvement in cattle over the span of my career, and I firmly believe in our philosophy on how to breed cattle.

What sets the ICC™ index apart are four key components: the first being production, the second being health traits and healthy cows, the third being fertility, and last – but not least – feed efficiency. Feed Saved is a real important part of ICC™, and I see it being more important as we move into the future.
