

Genetic Guide

APRIL 2026

GENEX[™]
FOR GENERATIONS

ICC[™]

Your herd is part of your legacy.

Build accordingly.

See page 2 to learn more.

You're not just managing a herd. You are building one.

The sires you choose, the genetics you prioritize and the matings you make all add up. You see the results in your calves, your cows and your milk tank. Those results are not random. They reflect how your genetic decisions align with the kind of cows you need and want. The GENEX ICC™ indexes give you a framework to build not just a herd but a legacy.

Four Index Options, From One Foundation

The ICC™ index was built on a foundation of balanced genetics for commercial profitability. Today, that foundation extends into four distinct ICC™ indexes, each with a slightly different emphasis. This gives you choices and helps you better align your genetic strategy with your milk market, your herd's genetic strengths and gaps, and your long-term priorities.

The indexes have been shaped with producer-driven feedback to reflect the practical needs of real herds, and each one has been validated on 45,000 genomic-tested cows in progressive herds to ensure predicted genetic responses match real-world results.

Not sure which ICC™ index is right for you?

Your GENEX representative can help you match the right index to your milk market, your herd's genetic profile and your long-term priorities.

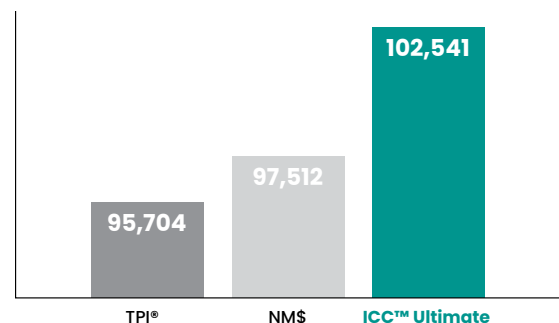

ICC™
Ultimate

Formerly the ICC™ index, now **ICC™ Ultimate**.
Formula updated to reflect a more 1:1 Fat to Protein ratio.

Built to balance lifetime ECM, health, repro & efficiency.

The ICC™ Ultimate index delivers balanced genetic progress across health, fertility, longevity and efficiency while outperforming other indexes for lifetime Energy Corrected Milk (ECM). Healthier, more fertile cows reach later lactations on schedule, lowering costs and maximizing lifetime profitability.

Average Lifetime lbs of Energy-Corrected Milk*

VIP Sire

ULTIMATE

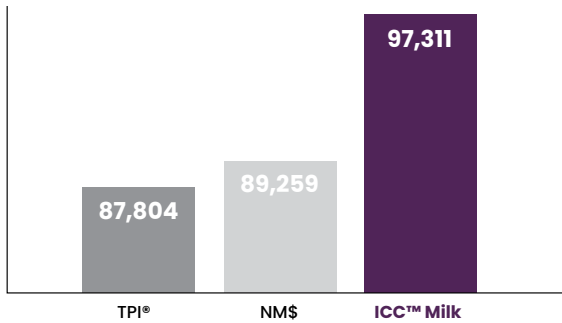

NEW!

Built to maximize lifetime milk.

The ICC™ Milk index leads selection indexes in lifetime milk production, making it ideal for fluid milk markets. More importantly, higher milk doesn't come at the expense of health or fertility. ICC™ Milk maintains strong performance in herd health traits, requires fewer breedings and supports cows reaching later lactations on schedule.

Average Lifetime lbs of Milk*

1HO17832	DREAMON	905

NEW!

Built with a health and fertility emphasis.

The ICC™ Health index helps prevent the health challenges that quietly erode profitability. With greater emphasis on Somatic Cell Count (SCC), mastitis and longevity, it delivers cows with better udder health, fewer transition issues and less need for intervention.

Top Quartile Average Per Index for Health & Production*

	TPI®	NM\$	ICC™ Health
Mastitis Event %	9.03	9.75	7.9

NEW!

Built to boost efficiency and save on input costs.

The ICC™ Efficiency index creates feed-efficient cows that convert inputs into more milk, reducing costs without sacrificing production. Strong longevity and livability drive higher lifetime Energy Corrected Milk (ECM), creating cows that stay longer, require fewer replacements and deliver sustainable, long-term profitability.

Expected Selection Response for Residual Feed Intake

A negative RFI means animals eat less than expected. A larger negative genetic selection response indicates genetics are driving animals to need less feed to produce the same amount of milk.

*This analysis uses a validation dataset of 45,000 genotyped cows with complete lifetime performance records. For each index, cows were ranked by their genomic index value and the top 25% (top quartile) were identified. The bars represent the average actual production of the top quartile of cows for each index.

Make Every Day Girls' Day

with GenChoice™ Sexed Semen

More heifers. More certainty.

GenChoice™ sexed semen delivers the heifer calves you need – backed by reliable fertility performance and data-driven insights that help you make smarter breeding decisions.

Data you can trust
Built on real breeding and pregnancy results.

Plan with confidence
Make smarter breeding decisions when every heifer counts.

Fertility that performs
Proven results backed by industry-leading quality.

PregCheck+™ Fertility Rankings

A simple, data-backed way to compare semen fertility. Higher rankings indicate improved conception performance.

Based on real breeding data. Built for real-world results.

Every breeding counts.

Use GenChoice™ sexed semen and leverage PregCheck+™ rankings for proven fertility.
